

# Wellington Ventures Ltd.

---

**Wellington Ventures specializes in providing turnkey, independent project development and acquisition due diligence services across power generation resources.**

## **Services**

We provide project development management, new energy technology feasibility assessments, and technical and commercial reviews prior to construction:

- Independent third-party assessment of business and project development opportunities
- Project management and team leadership for energy development from concept to construction
- Interim management of development team resources, including skills development, commercial acumen, engineering coaching and mentoring
- Technical and commercial due diligence on energy development opportunities
- New energy technology due diligence assessment

## **Background**

- Professional engineer with 15+ years' leadership experience in infrastructure project development with budgets from 1M to 33M CAD, for projects up to 2B CAD
- Led development of novel energy storage project (1.5B USD) in California including: development of Pre-FEED scope, schedule and cost estimate, regulatory/permitting/environmental strategy, commercial optimization, and construction contracting strategy
- Conducted commercial and technical due diligence for over 1B CAD of solar, wind and cogeneration projects, including management reviews and recommendations
- Supervised project management and proposal development of 1.8GW of NGCC power plants in Mexico, including: full technical optimization, EPC contract negotiation, commercial optimization, and regulatory/environmental review
- Provided the leadership for developing, recruiting and coaching a high performing project development team capable of developing power, pipeline and gas processing projects across Mexico and Latin America
